| <b>Pipeline:</b> | Primary Language: Java, Python<br>Repository: GitHub<br>Version Control: GitHub<br>Project Planning Board: Trello<br>Database Technology: CSV files       |

**The group members identified above have discussed and agreed upon the following articles as they pertain to the completion and delivery of their group project for CSCI 2040U.**

### **Communication**

- A Discord workspace will be created for the group to work and communicate.
- Group members are expected to reply to messages (either direct or to them within a group) within 24 hours of it being sent.

### **Group Meetings**

- The group will meet in-person weekly as part of the scheduled lab session to work on the specific assignment from the lab. Should they complete that work, the remaining time will be used to work on outstanding tasks or planning ahead.
- A report will be posted twice a week in a separate channel. Each report would be posted no later than Tuesday 11:59pm and Friday 11:59pm.
- There will be one virtual meeting once a week to discuss what has been completed so far and plans for the future.

### **Work Methods**

- The group will work all together during their weekly in person meetings. This will enable the effective communication necessary to make project wide decisions.
- All other coding will be done individually and then looked over on the In Person meeting on Fridays

- Code reviews must be completed before any code is committed to the main branch of the repo.

#### **Additional Items**

- All decisions about the direction of the project will be made as a team, in consultation with the customer.
- The team agrees to keep each other accountable, and will not take reminders to complete assigned tasks personally.
- Missing deadlines is not something that the team supports - instead, if you are falling behind, ask for help, it will be given, and in return, you offer your assistance when needed.

We hereby accept these terms and agree to work together as a team.
